Reference: DoD Instruction 8500.01

DoD Instruction 8500.01 tasks DISA “develops and maintains control correlation identifiers (CCIs), security requirements guides (SRGs), security technical implementation guides (STIGs), and mobile code risk categories and usage guides that implement and are consistent with DoD cybersecurity policies, standards, architectures, security controls, and validation procedures, with the support of the NSA/CSS, using input from stakeholders” and DoD Component heads “ensure that all DoD IT under their purview complies with applicable STIGs, security configuration guides, and SRGs.”
