03 May 2013

MEMORANDUM FOR DISTRIBUTION

SUBJECT: BlackBerry 10 OS Security Technical Implementation Guide (STIG)
Version 1

Reference: DoD Directive 8500.1

1. DoD Directive 8500.1 requires that “all IA and IA-enabled IT products incorporated into DoD information systems shall be configured in accordance with DoD approved security configuration guidelines” and tasks DISA to “develop and provide security configuration guidance for IA and IA-enabled IT products in coordination with Director NSA.
2. BlackBerry OS 10.0 does not support DoD Common Access Card (CAC) functions. CAC functions related to email and web site authentication will be supported in BlackBerry OS 10.1. Support for certificate-based authentication to Intranet sites using a CAC will be supported in BlackBerry OS 10.2. The DoD Agencies, Commands, or sites deploying BlackBerry OS 10.0 devices must set up procedures, compliant with the Mobile Application SRG, for performing a risk-based assessment of applications prior to application approval and installation.
3. Under the authority of DoD Directive 8500.1, DISA hereby releases the BlackBerry 10 OS STIG Version 1 for immediate use as a DoD-approved security configuration guide. The document is available on <http://iase.disa.mil>.
4. Point of contact for this action is FSO STIG Support Desk, email: disa.letterkenny.FSO.mbx.stig-customer-support-mailbox@mail.mil.
